

Hosting a game

You have a slot and need players

HOST SIDE

- 1 GameMatch tab → + **Post a Listing** → **Offer a game**.
- 2 Set your **skill range** (tap two levels), **players needed** (1–3 — "you + N more"), **when** (Flexible, or pick a day and a half-hour slot 6 AM–11:30 PM), venue, and price per head.
- 3 Requests arrive in the 🔔 **bell** and under **My Listings** — you see each player's **name and photo only**. Their number stays private.
- 4 Want to vet someone first? Tap 💬 next to their request — it opens **your own WhatsApp** chat with them. Talk, then decide.
- 5 **Accept** → the slot fills and their WhatsApp button unlocks. **Decline** → they get a polite note in their app. Your call, every time.
- 6 Friends joined outside the app? Use –/+ to adjust the count. Done early? Tap **Close**. When the last spot fills — or the game time passes — the listing **closes itself** and everyone still waiting is told automatically.

You are always in control. Nothing fills without your Accept, no one sees your number unless you message them, and no request is ever left hanging — the system answers everyone.
